Tortoise Capital Resources Corp. Releases Fiscal 2010 Third Quarter Financial Results

LEAWOOD, Kan., Oct 07, 2010 (BUSINESS WIRE) -- Tortoise Capital Resources Corp. (NYSE: TTO) (the company) today announced that it has filed its Form 10-Q for its third quarter ended Aug. 31, 2010.

Recent Highlights

- · Net assets of \$88.8 million or \$9.74 per share as of Aug. 31, 2010, an increase of 12 percent over last quarter
- · Third quarter 2010 distribution of \$0.10 per share paid Sept. 1, 2010

Performance Review

On Sept. 1, 2010, the company paid a distribution of \$0.10 per common share, the same amount as the prior quarter. The company determines the amount of distributions paid to stockholders based on distributable cash flow (DCF), which is distributions received from investments less total expenses. In May, the company received additional capital gain proceeds of \$585,000 from Mowood, LLC as a result of a contingent payment from the February sale of its Timberline Energy subsidiary. TTO elected to include these capital gain proceeds in its distribution last quarter and this quarter, enabling a distribution of \$0.10 per share. The company believes it will have sufficient cash flow to pay a \$0.10 per share distribution through the first quarter of 2011, subject to Board of Directors approval, continued portfolio company distributions at current levels, and anticipated non-recurring payments from its portfolio companies.

Net Asset Value

At Aug. 31, 2010, the company's net asset value was \$9.74 per share compared to \$8.69 per share at May 31, 2010, an increase of approximately 12 percent. The increase in net asset value is largely attributable to the increase in the fair value of International Resource Partners LP (IRP).

Portfolio Review

As of Aug. 31, 2010, the fair value of the company's investment portfolio (excluding short-term investments) totaled \$84.6 million, including equity investments of \$79.8 million and debt investments of \$4.8 million. The company's portfolio is diversified among approximately 45 percent midstream and downstream investments, 10 percent upstream, and 45 percent in aggregates and coal. The weighted average yield-to-cost on the investment portfolio (excluding short-term investments) as of Aug. 31, 2010 was 5.4 percent.

IRP's significant outperformance relative to budget, along with the recent robust pricing in the IPO and M&A markets for coal producers, resulted in an \$11.4 million increase in the fair value of IRP this quarter. IRP continues to significantly outperform due in part to the strong metallurgical coal market, and improved production and cost controls. IRP also increased its quarterly distribution from \$0.45 per unit to \$0.50 per unit this quarter.

The fair value of VantaCore Partners LP (VantaCore) decreased approximately \$1.5 million this quarter. VantaCore was unable to meet its minimum quarterly distribution (MQD) in cash for all unit holders for the quarter ended June 30, 2010. Common unit holders received a cash distribution equal to MQD of \$0.475 for the quarter, due to preferred unit holders' acceptance of a paid-in-kind distribution. VantaCore's poor performance has been driven primarily by the underperformance of its Southern Aggregates subsidiary, which has experienced lower demand and pricing coupled with higher than expected costs.

The fair value of High Sierra, inclusive of the interest in the general partner, increased by approximately \$550,000 this quarter. Monroe Gas Storage (High Sierra's underground gas storage business unit) cured the alleged technical defaults in its credit agreement which required additional capital investments. Based on recent modeling of the reservoir, the project has shown improved storage capacity which should lead towards significant improvement in 2011 EBITDA. High Sierra did not declare a cash distribution again this quarter as a result of its decision to reserve its DCF for anticipated capital expenditures; a decision its board of directors felt was in the best long-term interests of the partnership. High Sierra extended its existing credit facility through Dec. 15, 2010, and continues discussions with its lenders and expects to reach a long-term solution by the end of 2010. High Sierra reported year-to-date operating results through June 2010 below budget. Its crude oil gathering and natural gas liquids marketing companies continue to underperform due to lack of available credit and decreased margins; however the oilfield water recycling and discharge company continues to exceed budget.
