Forward Looking Statements

This presentation contains certain statements that may include "forward-looking statements" within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934. All statements, other than statements of historical fact, included herein are "forward-looking statements." Although CorEnergy believes that the expectations reflected in these forward-looking statements are reasonable, they do involve assumptions, risks and uncertainties, and these expectations may prove to be incorrect. Actual results could differ materially from those anticipated in these forward-looking statements as a result of a variety of factors, including, among others, failure to realize the anticipated benefits of the Crimson Transaction or Internalization (as further described in this presentation); the risk that CPUC approval is not obtained, is delayed or is subject to unanticipated conditions that could adversely affect CorEnergy or the expected benefits of the Crimson Transaction, risks related to the uncertainty of the projected financial information with respect to Crimson, the failure to receive the required approvals by existing CorEnergy stockholders; the risk that a condition to the closing of the Internalization may not be satisfied, CorEnergy's ability to consummate the Internalization, and those factors discussed in CorEnergy's reports that are filed with the Securities and Exchange Commission. You should not place undue reliance on these forward-looking statements, which speak only as of the date of this presentation. Other than as required by law, CorEnergy does not assume a duty to update any forward-looking statement. In particular, any distribution paid in the future to our stockholders will depend on the actual performance of CorEnergy, its costs of leverage and other operating expenses and will be subject to the approval of CorEnergy's Board of Directors and compliance with leverage covenants.

Non-GAAP Financial Measures

This document includes certain non-GAAP financial measures that are not prepared in accordance with accounting principles generally accepted in the United States ("GAAP") and that may be different from non-GAAP financial measures used by other companies. CorEnergy believes that the use of these non-GAAP financial measures provides an additional tool for investors to use in evaluating the Crimson Transaction. These non-GAAP measures should not be considered in isolation from, or as an alternative to, financial measures determined in accordance with GAAP. Additionally, to the extent that forward-looking non-GAAP financial measures are provided, including EBITDA, they are presented on a non-GAAP basis without reconciliations of such forward-looking non-GAAP measures due to the inherent difficulty in forecasting and quantifying certain amounts that are necessary for such reconciliation.

(1) The non-controlling interest reflects the Grier Members' equity consideration for the A-1, A-2 and A-3 units representing a 50.50% interest in Crimson. Subject to CPUC regulatory approval and certain stockholder approvals, these units are convertible into certain CorEnergy securities as illustrated in the prospective adjustments above.

(2) The increase in Series A Preferred Stock, Common Stock and Class B Common Stock reflect the prospective adjustment for the equity consideration outlined in the Internalization agreement. The Internalization agreement is subject to stockholder approval before such equity consideration can be issued. Refer to Part I, Item 1, Note 9 ("Management Agreement") in the Q1 2021 Form 10-Q for further details on the Internalization. Further, the prospective adjustments also reflect the Grier Members' conversion of the non-controlling interest presently represented by their A-1, A-2 and A-3 units into Series C Preferred Stock, Series B Preferred Stock and Class B Common, respectively. Such conversions are subject to receiving CPUC approval and, in case of the further conversion of Series B Preferred to Class B Common Stock, approval by our stockholders and are at the election of the holders. Further, we do not expect the holders to exercise their conversion rights all at once due to the income tax consequences arising from such conversions. We cannot predict when the holders will elect to convert or if they will elect to convert at all.

(3) The increase in the Series A Preferred Stock assumes the Grier Members elect to convert their Series C Preferred Stock. The increase in Class B Common Stock assumes stockholder approval is received allowing the Grier Members to convert the Series B Preferred Stock to Class B Common Stock.

(4) Long-term debt is presented net of discount and deferred financing costs.

(5) The shares outstanding do not include the impact of in kind dividends declared by the CorEnergy Board of Directors on the Series B Preferred.
